KEY SOLUTIONS

Enhancing Your Business with Expert Partnership

01

NEXT GEN IT

In today's fast-paced and technologically advanced business environment, maintaining a robust and efficient IT infrastructure is crucial for operational success.

02

POWER SOLUTIONS

We specialize in consulting, designing, supplying, installing and maintaining comprehensive uninterruptible power supply (UPS) and battery solutions tailored to meet the diverse needs of various industries.

03

AIDC (Automatic identification and data capture)

We provide tailored AIDC solutions to meet the unique needs of different industries, from Retail and Healthcare to Manufacturing and Logistics, ensuring efficient, accurate and secure data capture and management.

04

POS (Point of sale)

These solutions include advanced hardware, user-friendly software, smooth integration, reliable support, and customization ensuring efficient and seamless POS operations.

Experience Centre : We have a state of the art experience centre at our corporate office in Thane. An unique initiative, you can experience and evaluate all the cutting-edge technologies and products including POS Machines, Barcode Scanners, RFID Billing Solution & IP Camera, Digital Weighing Scales & Indicators, Thermal Printers, HHTs, and Interactive Display & Kiosk.

Extensive Geographical Reach : Turbonet has a strong presence in major cities including Mumbai, Pune, Nashik, Kolhapur, Ahmedabad, Vadodara, Hyderabad, New Delhi, Chennai, and Bangalore. We have network of 100+ partners for providing prompt service to our customers PAN India.

NEXT GEN IT

Turbonet delivers seamless IT infrastructure management from strategic planning and budgeting to deployment and life cycle support.

We eliminate bottlenecks with 24/7 expert monitoring and proactive, cost-efficient operations. Our Next-Gen cybersecurity and real-time threat detection secure your entire digital ecosystem. With deep cross-industry expertise, we handle everything from design to long-term support. Empower your business with scalable, intelligent, and future-ready infrastructure solutions from Turbonet.

Customized Solutions:

Turbonet develops strategic IT plans aligned with your business goals, advising on technology adoption, hardware management, and budgeting to ensure your IT infrastructure supports current and future needs.

Access to Expertise and Experience:

Turbonet's experienced IT team supports businesses with expert guidance and industry best practices, making advanced tech accessible to those without in-house specialists.

Improved Security:

Turbonet offers advanced cybersecurity solutions with continuous monitoring, updates, and tools like Next-Gen Endpoint & Email Security, Firewalls and IPS to keep your systems secure and up-to-date.

Cost and Time Savings:

Partnering with Turbonet saves time and costs by eliminating the need for in-house project managers, letting you focus on core business while we handle the IT management.

SOLUTIONS

Data Centre:

Comprehensive solutions for build a modernised next gen data centre with the data security, and infrastructure deployment. We ensure seamless setup, uptime, and scalability of your critical IT environment. Designed for reliability, optimized for performance, and built for the future.

The Core of Business Continuity.

Digital Transformation:

Empowering businesses to evolve with cutting-edge technologies and smarter processes. From infrastructure to analytics, we help you adapt, optimize, and innovate at scale. Stay competitive in a fast-changing world with agile, future-ready digital solutions.

Where Innovation Meets Execution.

Cyber Security:

Simplify protection with fast, intelligent solutions tailored for modern business. Automate defenses, reduce downtime, and boost response speed to cyber threats. Secure your operations without slowing down innovation.

Performance that Doesn't Blink.

Networking:

We design and deliver secure, scalable wired and wireless networks tailored to your business. From LAN setups to SD-WAN and advanced network analytics, we keep your systems connected and optimized. Empower your digital operations with seamless, high-performance networking infrastructure.

**Built for Uptime,
Powered for Performance.**

POWER: UPS, STABILIZERS AND BATTERIES

Turbonet specializes in providing end-to-end power solutions, including consulting, design, supply, installation, and ongoing maintenance. Our services cover a wide range of capacity loads from 1 KVA to 800 KVA as single units or in scalable combinations ensuring flexibility for diverse industrial needs.

With a strong focus on reliability and sustainability, our power solutions guarantee uninterrupted, clean energy with minimal environmental impact.

Single Phase UPS:

Designed for small to medium-scale setups, our single-phase UPS systems deliver true double-conversion online protection. They are ideal for safeguarding PCs, network devices, servers, and sensitive medical equipment.

Three Phase UPS:

For larger and more critical applications, our three-phase UPS systems offer high reliability and efficiency, with options for N+X redundancy and compact, front-access designs. These systems are suitable for data centers, manufacturing, healthcare, and other critical infrastructure needs.

POWER USE CASES

BFSI (Banking, Financial Services, and Insurance):

Ensure uninterrupted operations and protect sensitive financial data with reliable UPS and battery solutions.

Government Sector:

Support critical infrastructure with robust power backup systems to ensure continuous service delivery.

Telecom:

Maintain seamless communication networks with high-quality UPS and battery solutions designed specifically for telecom applications.

Healthcare:

Provide life-critical power protection for medical equipment and facilities, ensuring patient safety and uninterrupted healthcare services.

IT/ITES and Data Centres:

Safeguard your data and ensure 24/7 operational continuity with advanced UPS and battery systems tailored for IT infrastructure and data centres.

Process Industries:

Keep production lines running without disruption using power backup solutions built to meet the demanding needs of process industries.

Malls, Commercial Offices, and Retail Establishments:

Keep production lines running without disruption using power backup solutions built to meet the demanding needs of process industries.

AIDC & Automation Solutions For Business:

Turbonet provides tailored AIDC (Automatic Identification and Data Capture) solutions to meet the unique needs of different industries, from Retail and Healthcare to Manufacturing and Logistics, ensuring efficient, accurate and secure data capture and management.

We provide end to end services including Consulting, System Design, Implementation, Training & Support.

- Barcode / QR Based Solutions
- Wireless and Mobile Computing Solutions Radio Frequency Identification (RFID) Solutions
- Biometric Identification, Voice Recognition Systems Optical Character Recognition (OCR)
- Artificial Intelligence and Machine Learning (AI & ML) Magnetic Stripe and Smart Card Solutions
- Machine Vision Systems
- Hands-free barcode / RFID scanning via smart gloves or headsets for high-mobility tasks
- Magnetic Stripe & Smart Card Solutions
- GPS-based Fleet & Asset Tracking
- Automated Weighing, Dimensioning, Labeling & Printing Systems
- Inventory Management

AIDC USE CASES

Asset Tracking:

Track, monitor, and manage assets in real time with our advanced RFID and Barcode-based AIDC solution. Ensure optimal utilization, minimize losses, improve visibility, and streamline maintenance operations across your entire supply chain and infrastructure.

Digital Transformation:

Empower your business with seamless integration of IIoT and automation technologies.

We enable a smooth transition to a connected, data-driven ecosystem enhancing operational efficiency and preparing your enterprise for the future.

Real-Time Insights:

Gain instant visibility with real-time data capture and analysis through our AIDC systems. Make faster, smarter decisions to optimize operations, supply chains, and customer experiences.

Consumables & Print Media:

Ensure seamless operations with high-quality paper rolls, labels, carbon ribbons, and RFID tags. Support all your printing, tracking, and inventory labeling requirements with precision. Ideal for retail, logistics, warehousing, and asset management environments.

AV SOLUTIONS

We offers a wide range of Audio-Visual (AV) integration solutions, tailored to meet the unique needs of modern businesses. From design to installation and maintenance, our expertise covers every aspect of AV technology, enhancing communication, collaboration, and user experience across various environments, including corporate offices, educational institutions, retail spaces and many more.

AV and Collaboration tech now goes beyond meetings enhancing experiences across industries. Turbonet creates custom solutions for retail, hospitality, enterprise, and residential spaces. From visitor centers to command rooms and studios. Built for impact, engagement, & productivity.

AV USE CASES

Corporate Offices:

Enhance collaboration and communication with cutting-edge AV solutions tailored for modern boardrooms, meeting rooms, and workspaces.

Hospitality:

Create memorable guest experiences with smart room scheduling, digital signage, and seamless AV integration across your hotel or venue.

Educational Institutions:

Empower learning environments with interactive panels, digital classrooms, and hybrid teaching tools that make education engaging and accessible.

Events & Exhibitions:

Make a bold impact with vibrant video walls, active LED panels, and live-streaming tech that bring events to life.

Command & Control Centre:

Deliver mission-critical performance through large format displays, video walls, and real-time monitoring systems designed for 24/7 operations.

Retail Spaces:

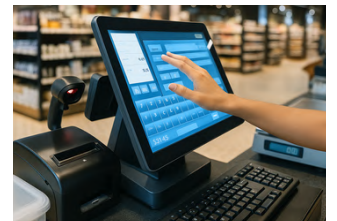

Captivate customers with immersive digital displays, interactive signage, and smart kiosks that elevate in-store experiences.

Retail Hardware & Devices:

Integrated POS machines, handheld terminals (HHT), secure cash drawers, fast barcode scanners, thermal printers, and precision electronic weighing scales together enabling smooth, efficient, tech-driven retail operations across formats.

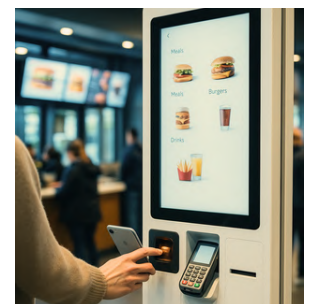

Smart Display & Labeling Solutions:

Transform retail operations with Electronic Shelf Labels (ESL) for real-time, accurate pricing. Minimize manual effort and enhance shelf management efficiency. Safeguard inventory with advanced RF & AM anti-theft systems.

Self-Service Kiosks:

Streamline services with interactive kiosk systems for ordering, billing, and customer information. Enhance user experience and reduce queue congestion with fast, self-service options. Powered by RFID technology for secure, contactless, and efficient transactions.

Precision & Commercial Scales:

Accurate and sleek weighing scales tailored for retail counters, billing stations, and warehouses. Smart display integration and multiple capacity options ensure smooth operations. Built for performance, reliability, and a seamless customer experience.

KIOSK

We offers a range of innovative kiosk solutions designed to benefit businesses across various sectors. These state-of-the-art solutions integrate advanced hardware and software, providing a comprehensive product.

Self Ordering Kiosk in QSR

Our Solutions include:

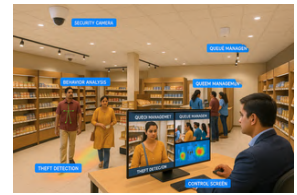

- Self-ordering / Self Checkout Kiosks Registration, Ticketing.
- Information Kiosks.
- Visitor Management system Way finder, Selfie Kiosks.
- Feedback/Surveys Solutions - Tablet based Interactive solution.
- Let customers enroll, update details, or check rewards instantly.
- Collect real-time customer insights through interactive, tablet-based forms.
- Help users navigate spaces like malls, hospitals, or campuses with ease.
- Generate tokens and display queue status for smooth crowd flow and reduced wait times.
- Let customers browse products, check availability, and compare options in-store.

CCTV & AI VIDEO ANALYTICS

Retail:

Customer behavior analysis, queue management, theft prevention, and store layout optimization

Smart Cities:

Traffic monitoring, public safety, crowd management, and infrastructure monitoring

Manufacturing:

Quality control, safety compliance, process optimization, and equipment monitoring

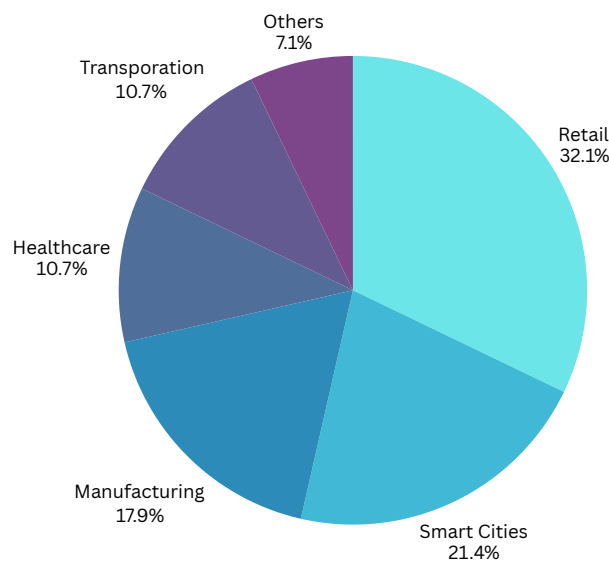

Healthcare:

Patient monitoring, facility security, hygiene compliance, and staff efficiency

Market Adoption By Industry

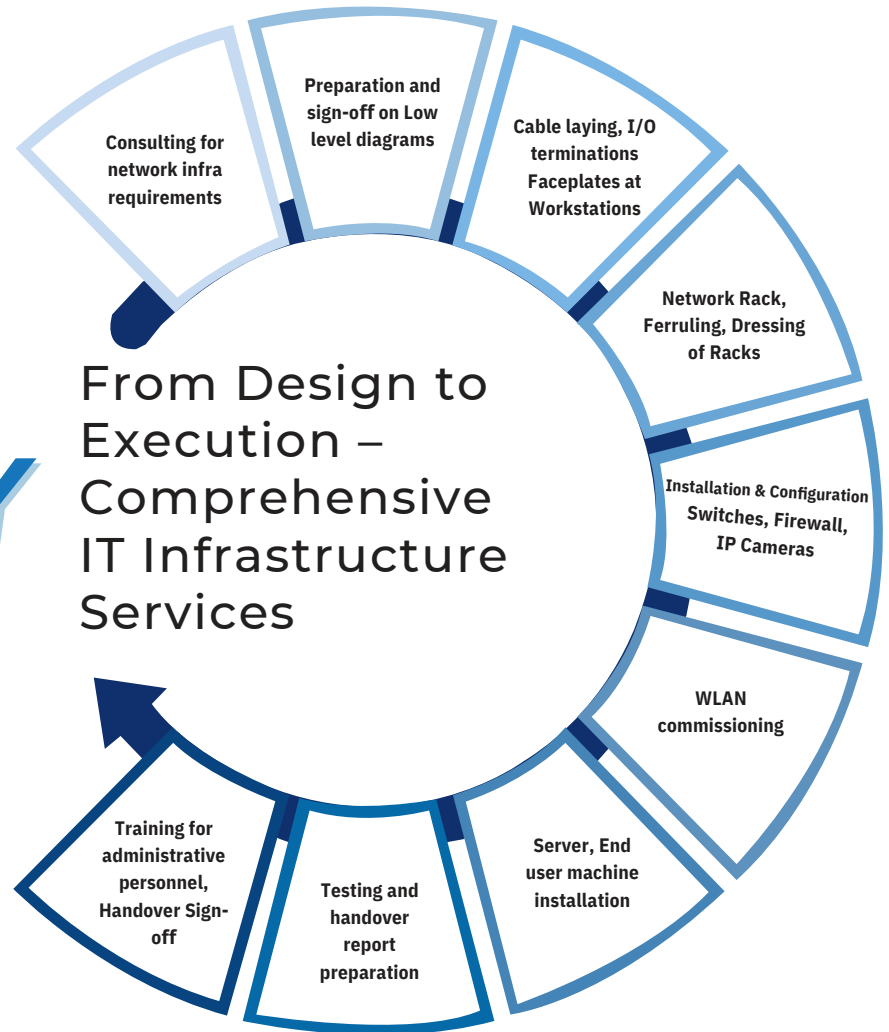

Why Upgrade To Video Analytics ?

Transitioning from traditional CCTV to smart video analytics transforms surveillance into an active security and business intelligence solution enhancing threat detection to reduce incidents by up to 60%, lowering staffing costs, and providing valuable insights into customer behavior and operational efficiency.

Vision

Turbonet believes that every business, aiming to introduce a great idea of product or service to the world, must have every technical capability to do so. We envision becoming one of the world's leading company in providing high-quality and affordable IT Infrastructure & Cloud services to help start-ups and companies of any size accomplish projects of any scope.

Mission

We deliver smart, reliable IT solutions that drive business growth and efficiency. We build strong partnerships and embrace the latest technologies to add real value. Our focus on integrity, innovation, and customer satisfaction powers every solution. We also foster continuous learning to strengthen both our team and client success.

Arvind Chavan
Managing Director

Arvind Chavan a first generation enterprenuer with a vision of making a difference through service. He started the company in the year 1999 as an IT infrastructure solution provider to support SMB's. He has done his MCA with MBA in marketing. He has 20+ years of industry experience. Under his leadership, Turbonet has created a niche in providing technology solutions to our clients.

Sunil Chavan
Director

Sunil Chavan has played a key role in building a customer-focused organisation. He leads project execution and customer support, ensuring the team remains responsive to evolving customer needs. His initiatives have enhanced service delivery, upgraded team skills, and aligned the organisation with changing technology trends.
